

PROJECT CASE STUDY

GRM-001

Access platform & stairs with handrails all made & installed by Procter

Staircase with handrails that meet the required standard height

Staircase to access platform designed by Procter fits the plant space

Procter provide design, manufacture and installation service on Access Platforms

LOCATION OF PROJECT

Ricarton Kilmarnock

CLIENT

Mahle Engine Systems

PROJECT OVERVIEW

The customer was advised following a site inspection, that the stairs were too steep, and the handrails were all below the required height. Following a consultation meeting, Procter carried out on-site measuring and design of new compliant handrails and staircases.

PROJECT NOTES

This was an urgent job Procter delivered to meet the customer's need. The site installation was accomplished during the Easter shutdown, and the result addressed all points raised by the inspection.

CLIENT FEEDBACK

Very pleased with the job, showed improvements in inspection. Good measuring and well manufactured for easy fitting.
